

CINESTARTMPANEL

CinemaShop.com® and our [CineStarPanel](http://CineStarPanel.com)™ brand offers the most realistic star ceilings that we know of, with the most advanced control options available.

- CinemaShop.com® has been in business for over 23 years, is well known for customer service excellence and has an [A+ rating with the Better Business Bureau](#), with never having a complaint lodged with the BBB.
- For the past 15 years, we believe that CinemaShop.com® has sold more star ceilings than anyone in the world and we have the most experienced fabricators manufacturing our star panels, providing high quality fit and finish, plus creating random and very realistic star patterns.
- [CineStarPanel](http://CineStarPanel.com)™ products utilize 3 different fiber optic strand diameters in our panels for dim, medium and brighter star variations, which significantly enhances realism.
- A quarter of our fiber stars are always on, with the other three quarters set to random twinkling frequencies, creating the most realistic star ceiling that we know of.
- Our control boards and fiber networks are built into each fabric wrapped acoustic panel for ease of installation and many years of dependable operation.
- [CineStarPanel](http://CineStarPanel.com)™ control boards are the most advanced in the industry, offering features such as Bluetooth control via Android®, Apple® and RS-232. Android/Apple Apps and RS-232 control codes provided free with controller purchase. Download our “Illuminate 1.0” app for free from the Android® or Apple® store to check it out.
- We now offer not only the natural white stars we've become famous for, but also **multi-colored stars** on our star panels with the RGBW technology we employ (Bluetooth controller purchase required).
- We provide a 1-year star panel warranty with power transformers warrantied for 90 days.
